

We have copies of most textbooks for SVSU Math classes from 081-262 (and some higher) and student solution manuals. You may check out a book for use in the library. Go the receptionist at front desk of the second floor of the library to check out the book you want. (Some professors use alternate texts in courses that are not departmentally coordinated. So it's possible that we won't have the books for all classes.)

You can also check out a scientific calculator if you forgot to bring one for a test. Calculators are due by 9:00AM on following day. (Sorry, graphing calculators are not available.)
